

Salih Kuloğlu

JUNIOR SOFTWARE DEVELOPER

✉ kuloglusalih10@gmail.com

📍 Sakarya, Turkey

☎ 05352417915

Summary

I took part in national and international projects such as Teknofest in order to improve myself in line with my researcher personality, curious nature and interest in innovations and the skills I have acquired in my career steps that I took with the aim of becoming a competent engineer in the field. At the same time, I received 8 months of workplace training within the scope of my school's cooperative education program. I gained start-up experience by working in areas I am interested in to strengthen my qualifications such as teamwork and process management. I believe that I can add great value to the unit and the company I will work with with my knowledge, teamwork and visionary personality that I develop day by day.
